PowerPact™ System - 7.5 kW**features and benefits****Engine**

- Generac OHV engine A durable, reliable powertrain for maximum power output.
- Cast iron cylinder walls Rigid construction and added durability provide long engine life.
- Low oil level shutdown system Shutdown protection prevents catastrophic engine damage due to low oil.
- High temperature shutdown Prevents damage due to overheating.

Generator

- Revolving field Allows for a smaller, light weight unit that operates 25% more efficiently than a revolving armature generator.
- Skewed stator Produces a smooth output waveform for compatibility with sensitive electronic equipment, with less than 5% THD (total harmonic distortion).
- Displaced phase excitation Maximizes motor starting capability.
- Automatic voltage regulation Regulates the output voltage to $\pm 5\%$ prevents damaging voltage spikes.
- UL 2200 listed For your safety.

Transfer Switch (if equipped)

- Fully automatic Transfers your vital electrical loads to the energized source of power.
- Remote mounting Mounts near your existing distribution panel for simple, low cost installation.
- Flush mountable Can be installed between studs like a standard electrical panel.
- UL listed For your safety.

Digital Controls

- Multiple LED annunciation Provides specific system information without having to open the generator enclosure.
- Auto/Off/Manual buttons Select the operating mode.
- Utility voltage sensing Constantly monitors utility voltage, setpoints 65% dropout, 80% pick-up, of standard voltage.
- Utility interrupt delay Prevents nuisance start-ups of the engine; setpoint approximately 5 seconds.
- Engine warm-up Ensures engine is ready to assume the load; setpoint approximately 6 seconds.
- Engine cool-down Allows engine to cool prior to shutdown; setpoint approximately 1 minute.
- Cold Smart Start If the ambient temperature is cold, allows engine to warm up before load is applied
- Seven day exerciser Operates engine to prevent oil seal drying and damage between power outages. (Adjustable to bi-weekly or monthly through the MobileLink™ system - sold separately.)
- Smart battery charger Maintains battery charge level to ensure starting.
- Main line circuit breaker Protects generator from overload.
- Multiple protection features Prevents additional damage from occurring within the generator if a fault condition arises.

Unit

- UL weather protective enclosure Sound attenuated enclosure ensures quiet operation and protection against Mother Nature. Three panels are removable for easy service and maintenance access.
- Enclosed critical grade muffler Quiet, critical grade muffler is mounted inside the unit to prevent injuries.
- Small, compact, attractive Makes for an easy, eye appealing installation, as close as 18" away from a building.*.

Installation System

- 1 ft (305 mm) flexible fuel line connector Absorbs any generator vibration when connected to rigid pipe.
- Composite mounting pads Eliminates the need to pour a concrete pad unless required by local municipalities.
